

The Oxford Thesaurus  
An A-Z Dictionary of Synonyms

INTRO Introduction

-----

In its narrowest sense, a synonym is a word or phrase that is perfectly substitutable in a context for another word or phrase. People who study language professionally agree that there is no such thing as an ideal synonym, for it is virtually impossible to find two words or phrases that are identical in denotation (meaning), connotation, frequency, familiarity, and appropriateness. Indeed, linguists have long noted the economy of language, which suggests that no language permits a perfect fit, in all respects, between any two words or phrases. Many examples of overlapping can be cited; the more obvious ones in English are those that reflect a duplication arising from Germanic and Romance sources, like motherly and maternal, farming and agriculture, teach and instruct. In such pairs the native English form is often the one with an earthier, warmer connotation. In some instances, where a new coinage or a loanword has been adopted inadvertently duplicating an existing term, creating 'true' synonyms, the two will quickly diverge, not necessarily in meaning but in usage, application, connotation, level, or all of these. For example, scientists some years ago expressed dissatisfaction with the term tidal wave, for the phenomenon was not caused by tides but, usually, by submarine seismic activity. The word tsunami was borrowed from Japanese in an attempt to describe the phenomenon more accurately, but it was later pointed out the tsunami means 'tidal wave' in Japanese. Today, the terms exist side by side in English, the older expression still in common use, the newer more frequent in the scientific and technical literature.

Any synonym book must be seen as a compromise that relies on the sensitivity of its users to the idiomatic nuances of the language. In its best applications, it serves to remind users of words, similar in meaning, that might not spring readily to mind, and to offer lists of words and phrases that are alternatives to and compromises for those that might otherwise be overused and therefore redundant, repetitious, and boring. The Oxford Thesaurus goes a step further by offering example sentences to illustrate the uses of the headwords and their alternatives in natural, idiomatic contexts.

1. Selection of headwords

Two criteria have been employed: first, headwords have been selected because of their frequency in the language, on the assumption that synonyms are more likely to be sought for the words that are most used; second, some headwords of lower frequency have been included because it would otherwise be impossible to find a suitable place to group together what are perceived as useful sets of synonyms with their attendant illustrative sentences. Obvious listings have been omitted on the grounds that users of the Thesaurus can easily find synonyms for, say, abdication by making nouns of the verbs listed under abdicate. This deliberate attempt to avoid duplication is mitigated in the case of very common words. For the convenience of the user, both shy and bashful are main entries, as are method, manner, and mode, which, though much the same in some respects, differ in detail and application. In this book, however, mitigate is a main entry but not mitigation, mistake and mistaken are main entries but not mistakenly, etc. Where it is determined that such derivations are neither automatic nor semantically obvious, separate listings have been provided.

## 2. Illustrative sentences

On the principle that a word is known by the company it keeps, one or more sentences showing the main entry word in context are provided for each sense discrimination. These have been carefully selected to demonstrate the use of the main entry in a context likely to be encountered in familiar written or spoken ordinary English. (See also 7, below.)

## 3. Synonym lists

Each main entry is followed by one or more sense groupings, each illustrated by one or more sentences. An effort has been made to group the synonyms semantically as well as syntactically and idiomatically: that is, each synonym listed within a given set should prove to be more or less substitutable for the main entry in the illustrative sentence.

In some instances, idiomatic congruity may, unavoidably, become strained; where it is felt to be stretched too far--though still properly listed among its accompanying synonyms--a semicolon has been inserted to separate sub-groups of synonyms, and, in many cases, additional illustrative sentences have been provided. Such sub-groupings have been confined largely to distinctions between

literal uses and figures of speech, between transitive and intransitive verbs, and between synonyms that differ in more subtle aspectual characteristics of meaning or syntax. (See also 7, below.)

Not all senses of all words are covered for either or both of the following reasons: the sense, though it exists, is relatively rare in ordinary discourse and writing; there are no reasonable synonyms for it. Thus, this sense of mercy,

an affecting or moving of the mind in any way; a mental state brought about by any influence; an emotion or feeling: Mercy is an affection of the mind.

is not covered for the first reason, as it is a literary and somewhat archaic usage. The same can be said for the sense,

a bodily state due to any influence

and for other senses listed in the largest dictionaries but rarely encountered except in literary contexts. Even in such contexts it would be unusual to need a synonym for this word and others like it.

#### 4. Cross references

There are very few cross references between main listings in the Thesaurus. Where such cross references do occur, they are simple and straightforward:

superior adj....3 See supercilious, above. --n 4 See supervisor, below.

A number of cross references occur within entries, between variant forms of an expression. At the entry for take, for example, as one can say either take or take it in the sense of 'understand' etc., the option is shown in the following way:

take v...19 understand, gather, interpret, perceive, apprehend, deduce, conclude, infer, judge, deem, assume, suppose, imagine, see: I take him to be a fool. I take it from your expression that you've had bad news.

33 take it: a withstand or tolerate or survive punishment or abuse, survive: The Marines are extremely tough and can take

it. b See 19, above.

In a few entries, the form 'See also' is used.

## 5. Labels

- a. All words and phrases that are recognized as being typical of a particular variety of English, whether geographical or stylistic, are labelled. It might at first seem that a large number of colloquial, slang, and taboo words have been included. The labels used are those commonly encountered in ordinary dictionaries:

**Colloq** Colloquial; informal; used in everyday conversation and writing, especially in the popular press and in dramatic dialogue; sometimes avoided where more formal language is felt to be appropriate, as in business correspondence, scholarly works, technical reports, documents, etc.

**Slang** Belonging to the most informal register and characteristic of spoken English; often originating in the cult language of a particular socio-cultural group. Not sufficiently elevated to be used in most writing (aside from dialogue), although often found in the popular press and frequently heard on popular radio and television programmes.

**Taboo** Not used in polite society, usually because of the risk of offending sexual, religious, or cultural sensibilities; occasionally encountered on late-night television and radio; often occurring in graffiti and in dialogue in novels, plays, and films.

**Archaic** Describing an obsolete word or phrase (like tickety-boo, lounge lizard) that is used deliberately to invoke the feeling of a bygone time.

**Old-fashioned**

Used of a synonym (like comfit) that is no longer current but might occasionally be encountered among older speakers and in older writing.

**Technical** Used of a somewhat specialized word that is not commonly

encountered in ordinary, everyday English, like defalcator, which appears as a synonym under swindler.

**Literary** Describes a word, like euchre 'cheat', that is not usually met with in everyday language, even of the formal genre, but may be found in poetry and other literary works.

**Brit, US, Australian, Canadian, New Zealand**  
Marks a word or phrase that occurs mainly in the designated variety.

The meanings of other labels are self-evident.

- b. All labels can occur in combination. Usage labels always take precedence over regional labels. For example,

pushover n. 1 sure thing, Colloq piece of cake, child's play, snap, picnic, walk-over, US breeze, Slang cinch, Brit doddle, US lead-pipe cinch.

Here 'sure thing' is standard universal English. All words and phrases following Colloq up to the Slang label are colloquial: 'piece of cake,...walkover' are universal colloquial English, 'breeze' is US colloquial. All synonyms following the Slang label are slang; 'cinch' is universal English slang, 'doddle' is confined to British slang, and 'lead-pipe cinch' is confined to American slang.

talented adj....Colloq ace, crack, top-notch, Brit wizard, whizzo, US crackerjack.

In this entry, all synonyms shown are colloquial, 'ace, crack, topnotch' being universal English, 'wizard, whizzo' British, and 'crackerjack' US.

It must be emphasized that such labels are to some extent impressionistic and are based in the Thesaurus on a consensus of several sources: that is, there is no implication that 'breeze' is never used in the sense of 'pushover' except in the US, nor should such an inference be made.

- c. Comments regarding what might be viewed as 'correct' in contrast

to 'incorrect' usage are generally avoided. For example, the non-standard use of *between* in contexts referring to more than two of anything or of *among* in contexts involving fewer than three goes unmarked. However, if the usage question is confined to what can easily be represented in a 'lexical' environment, then suitable treatment is accorded it; thus *'now'* and *'at present'* are labelled Non-Standard under *presently*. To take another example, *'different to'*, in the typically British usage *His house is different to mine*, is rarely encountered in American English; in American English, purists condemn *'different than'*, as in *His house is different than mine*, which is increasingly heard in British English; purists on both sides of the Atlantic prefer *'different from'*. Such matters are best left to usage books and to usage notes in dictionaries and are not treated in the Thesaurus.

- d. Main entry words and sub-entries are not labelled, only the synonyms. Thus, under *beat* appears the idiomatic expression, *beat it*, which is not labelled:

8 *beat it*: depart, leave, abscond, run off or away, Slang  
US take it on the lam, lam out of here, hit the road:  
You'd better beat it before the cops come.

The idiom is not labelled because it is assumed that the user has looked it up to find a substitute for it, hence needs no information about it other than a listing of its alternatives (which are labelled, when appropriate) and an illustrative example.

A rare exception to the above rule occurs where a headword has one meaning in British English and quite a different meaning in another regional variety. Thus:

subway n. 1 In US: underground (railway), tube: She takes the subway to work. 2 In Britain: tunnel, underpass: Use the subway to cross the road in safety.

Here, the two regional labels do not apply to the synonyms (since, for example, *'tunnel'* has the same meaning in both British and US English) but to the two definitions of the headword.

- e. Synonyms bearing any kind of label appear at the end of the set in which they are listed, except in the case described immediately

above.

## 6. Spelling and other variants

The spellings shown throughout are those preferred by most modern British writers. British variant spellings are shown; if they are variants of the main entry word, they appear as the first word in the set(s) of synonyms following:

mousy adj. 1 mousey,...  
movable adj. moveable,...

Such variants are also shown when they appear within an entry:

movable adj....transferable or transferrable,...

Common American spelling variants (humor, traveler, unraveled) are not shown, but less common ones are listed for convenience. Where both forms are variants in American spelling, they are described by 'or US also':

...accoutrements or US also accouterments,...  
...phoney or US also phony,...

This should be understood to mean 'the normal British spelling is accoutrements (or phoney); this form, together with accouterments (or phony), occurs in American English'.

## 7. Substitutability

- a. The purpose of a synonym book is to provide the user with a collection of words that are as close as possible in meaning to a designated word. The Oxford Thesaurus tries to go to a step further by providing examples that not only illustrate the main entry word in a natural contextual environment but also allow the user to substitute as many of the synonyms as possible into the framework of the context. For example:

porous adj. spongy, spongelike, permeable, pervious,  
penetrable: The rainwater runs through the porous rock and  
collects in the pools below.

It is possible to substitute for porous in the sample sentence any

of the words given as synonyms without any adjustment of the grammar or phrasing of the example. That is not to suggest that the synonyms are identical: 'permeable' and 'pervious' belong to a different register from that of 'spongy, spongelike', being more common in technical usage. Some might argue that 'penetrable' is not synonymous with the other listed words; but it is the function of this book to provide synonyms for the main entries, not for the other synonyms that might be listed. No claim is made--nor could it be made--that synonyms are identical, either to one another or to another word, merely that they fall well within the criteria of what, for practical purposes, is viewed as synonymy in the language.

It is certainly true that substituting for porous any of the five listed synonyms will yield five standard English sentence.

- b. Some judgement is required of the user in determining the syntax and idiomaticity with which a given word or expression can be substituted in an illustrative context: words are rarely as readily interchangeable in a context as might be components in a chemical or mathematical formula. Moreover, while such formulae are reflective of science, language offers its users the virtually infinite variety available only in art, with each individual speaker of any language being presented with the opportunity to become an artist.

In the following example, nearly all terms can be substituted for adjoining in the first illustrative sentence; to create idiomatic parallels to the second sentence, the parenthetical prepositions must be used:

adjoining adj. neighboring, contiguous (to), adjacent (to), abutting, bordering, next (to): We have bought the adjoining land and will build our new house there. The land adjoining the supermarket is for sale.

Interpreting this, the following are all idiomatic: adjoining land, neighbouring land, contiguous land, adjacent land, abutting land, and bordering land. But if the context requires the adjective to come after land (with a following noun), then the parenthetical words must be added to yield constructions that are idiomatic, like land adjoining the supermarket, land neighboring the supermarket, land continuous to the supermarket, land adjacent

to the supermarket, land abutting the supermarket, land bordering the supermarket, and land next to the supermarket.

As this is intended as a synonym book and not a work on English collocations, the treatment of idiomaticity cannot be taken further.

- c. There are other reasons why direct substitutability is not always possible within a single semantic concept. The following extract demonstrates this:

possess v.... 3 dominate, control, govern, consume, take control of, preoccupy, obsess; charm, captivate, enchant, cast a spell on or over, bewitch, enthrall: What possessed her to think that I could help? He behaves as if he is possessed by the devil.

Here, two aspects of the same sense have been divided by a semicolon, with the synonyms preceding the semicolon illustrated by the first contextual example and those following it by the second. While it may be argued that in this instance the synonyms following the semicolon, with their illustrative sentence, might better have been listed in a separately numbered set, the close semantic association of the two groups would thereby have been lost.

- d. Sometimes, where the sub-sense is familiar enough not to require its own example yet needs to be set off from the other synonyms because of a subtle or aspectual semantic distinction, a semicolon is inserted among the synonyms and only one example is provided:

practice n.... 2 exercise, discipline, drill, practising, repetition, rehearsal, training, preparation, workout, warm-up; application, study: She needs more practice on the beginner's slope before going down the main piste.

the idiomatic usage of this sense of 'study' and 'application' is sufficiently familiar not to require separate example.

On the other hand, a second example is needed for the next sense of practice:

...3 pursuit, exercise, work, profession, career,

vocation, conduct; business, office: He genuinely enjoys the practice of law. I heard of a veterinary practice for sale in Yorkshire.

It would be difficult--perhaps impossible--to defend such fine distinctions in every instance: indeed, as a comparison of the different lengths of the entries in any dictionary will quickly reveal, language does not provide the same levels of sense discrimination for all words. The metaphorical focus and diversity of a language provide for polysemy in some semantico-cultural spheres but not in others. The classic observation often cited to demonstrate this linkage is that of the Inuit language that has a large number of distinguishing words for types of snow or of the African language that has an extensive vocabulary to describe the kinship among its speakers. On the grounds that the lexicon of a language is moulded by speakers who, quite naturally, use it to talk (and write) about things that are important to them, one might be tempted to draw conclusions about the voracity of English-speakers by reflecting that the entry for take has about twice as many definitions in most dictionaries as that for give.

- e. Often, the semicolon may be used to separate transitive uses of a verb from intransitive:

preach v....2 moralize, sermonize, advise, counsel, admonish, reprimand, lecture, harangue, pontificate; urge, inculcate, advocate: Mother used to preach to us about being charitable. Father preached restraint in all things.

Because of the behaviour of verbs in English, different synonyms may be required depending on what the object of the verb is and, often, whether the object is a word or phrase or a clause:

predict v. foretell, prophesy, forecast, foresee, augur, prognosticate, forewarn, presage, vaticinate; portend, foreshadow, foretoken, forebode; intimate, hint, suggest: My mother predicted that there would be moments like this. If only I could predict the winner of the 2.30!

- f. Wherever possible, the proper prepositional or adverbial particle normally accompanying a verb in a certain sense has been supplied, though it must be emphasized that the one offered is the most

frequently used and not, necessarily, the only one acceptable in standard usage. Particles used with some words may vary considerably, owing not only to dialect variation but also to whether the verb is used actively or passively as well as to which nuance of meaning, sometimes far too subtle to be dealt with adequately in a book of this kind, is to be expressed. The following entry illustrates the full treatment that can be accorded to words that occur in a wide variety of grammatical environments:

persevere v. Often, persevere in or with or at: persist, resolve, decide, endure, continue, carry on or through, keep at or on or up, be steadfast or staunch or constant, keep going, stand fast or firm, see through, be or remain determined or resolved or resolute or stalwart or purposeful or uncompromising, be tenacious or persistent or constant or pertinacious or assiduous or sedulous, be tireless or untiring or indefatigable, show determination or pluck or grit, be plucky, be patient or diligent or stubborn or inflexible or adamant or obstinate or obdurate, show or exhibit or demonstrate patience or diligence or stubbornness or inflexibility or obstinacy or obduracy, remain dogged, pursue doggedly, be intransigent or intractable, cling to, stick to, support, stop at nothing, sustain, Colloq stick with, stick (it) out: We must persevere to win. I shall persevere in my loyalty.

- g. In some adjective senses, a split might occur between attributive and predicative uses, though in most such cases, where the syntax is open, only one, usually common, illustration is given. For example, alone is used only predicatively or post-positively, not attributively; that is, one cannot say \*An alone woman...In this particular case, the normal attributive form would be lone, but lone is not listed as a synonym for alone because they are not mutually substitutable. It is acknowledged that the detailed description of the special syntactic ways in which certain words (like alone, agog, galore) behave lies outside the province of this book.

Although similar cautions must be observed and adjustments made throughout, it is hoped that the illustrative sentences will provide a substantial basis for the user to identify idiomatic

contexts and to discriminate senses that are not always carefully distinguished in dictionaries.

## 1.0 A

-----

### 1.1 abandon...

-----

abandon v. 1 give up or over, yield, surrender, leave, cede, let go, deliver (up), turn over, relinquish: I can see no reason why we should abandon the house to thieves and vandals. 2 depart from, leave, desert, quit, go away from: The order was given to abandon ship. 3 desert, forsake, jilt, walk out on: He even abandoned his fianc,e. 4 give up, renounce; discontinue, forgo, drop, desist, abstain from: She abandoned cigarettes and whisky after the doctor's warning.

--n. 5 recklessness, intemperance, wantonness, lack of restraint, unrestraint: He behaved with wild abandon after he received the inheritance.

abandoned adj. 1 left alone, forlorn, forsaken, deserted, neglected; rejected, shunned, cast off or aside, jilted, dropped, outcast: An abandoned infant was found on the church steps. Totally alone, she felt abandoned by her friends. 2 bad, immoral,

amoral, wicked, sinful, evil, corrupt, unprincipled, unrestrained, uninhibited, reprobate; loose, wanton, debauched, wild, dissolute, dissipated, profligate; depraved, lewd, lascivious, flagitious: His abandoned behaviour soon landed him in jail.

#### abbreviate

v. 1 shorten, compress, contract, truncate, trim, reduce, curtail: We abbreviated some of the longer words to save space. 2 shorten, cut, condense, abridge, abstract, digest, epitomize, summarize, US synopsise: The school presented an abbreviated version of A Midsummer Night's Dream.

#### abbreviated

adj. skimpy, brief, revealing: The dancers' abbreviated costumes shocked some members of the audience.

#### abbreviation

n. initialism; acronym; shortening, contraction: UK is one kind of abbreviation, or initialism; NATO, which is pronounced as a word, is another, usually called an acronym.

abdicate v. give up, renounce, disclaim, waive, disown, surrender, yield, relinquish, abandon, resign, quit: He abdicated all responsibility for care of the children. She abdicated the throne to marry a commoner.

abduct v. kidnap, carry off, make away or off with, seize, Slang US snatch, grab: The child that was abducted is safe.

abet v. 1 encourage, urge, instigate, incite, provoke, egg on, prod, goad; aid, help, assist: The jury found that his wife had abetted him in the murder. 2 countenance, approve (of), support, endorse, second, sanction, condone; further, advance, promote, uphold: By failing to inform on the terrorists, the neighbours abetted the bombing.

abeyance n. in abeyance. pending, abeyant, reserved, in reserve, shelved, pushed or shoved or shunted aside, postponed, put off, suspended, US tabled; temporarily inactive, dormant; latent; Colloq in a holding pattern, on the back burner; Slang on hold, in the deep-freeze, on the shelf, on ice, hanging fire: Legal proceedings were held in abeyance so that talks could take place

to reach an out-of-court settlement.

**abhor** v. hate, loathe, detest, abominate, execrate; regard or view with horror or dread or fright or repugnance or loathing or disgust, shudder at, recoil or shrink from; be or stand aghast at: He said that he abhorred any violation of human rights.

**abhorrent** adj. hateful, detestable, abhorred, abominable, contemptible, odious, loathsome, horrid, heinous, execrable, repugnant; repulsive, repellent, revolting, offensive, disgusting, horrifying, obnoxious: The idea of war was totally abhorrent to her.

**abide** v. 1 stand, endure, suffer, submit to, bear, put up with, accept, tolerate, brook: How can you abide the company of such a fool? 2 live, stay, reside, dwell, sojourn: Local people believe that the rain god abides in these mountains. 3 remain, stay, continue, tarry; linger, rest: He'll abide in my care till he can walk again. 4 abide by. consent to, agree to, comply with, observe, acknowledge, obey, follow, submit to, conform to, keep to, remain true to, stand firm by, adhere to, hold to: You must abide by the rules of the club if you become a member.

**abiding** adj. lasting, permanent, constant, steadfast, everlasting, unending, eternal, enduring, indestructible; unchanging, fast, hard and fast, fixed, firm, immutable, changeless: Her abiding love is a solace to him.
