MINICRAFT / ACADEMY

**This is an un-retouched macro-photograph
of the surface detail on a typical
MINICRAFT/ACADEMY
MODEL AIRPLANE KIT**

Gone are the old days of sanding off ugly standing rivets and panel lines to make a presentable model. The technology employed by only the finest model kit makers is the CAST COPPER method of tooling. Only this highly advanced and very expensive technique can yield the subtle engraved panel lines and near-flush rivets that set **MINICRAFT/ACADEMY** model kits apart from the rest of the field.

MINICRAFT/ACADEMY is constantly striving to achieve the absolute ultimate in quality while maintaining our policy of providing the best value on the market.

We welcome any suggestions or comments.

BOEING B-17C/D FLYING FORTRESS

Contains parts and decals to build either the B-17C flown by Colin Kelly, America's first hero in WWII or a colorful 436th Bombardment Group B-17D in natural metal finish. Model features all recessed panel lines and extensive interior detail including bomb bay and bombs. 1/72nd scale.

2150

CONSOLIDATED B-24M LIBERATOR

The last and best of the Liberators. Colorful nose art markings are of "Tall, Torrid and Texas" piloted by Lt. Carl McKinnon of the 459th Bomb Group, 757th Bomb Squadron. The model has optional position bomb bay doors enclosing a fully detailed bomb bay with bombs. The cockpit and bombardier's station are fully detailed. All exterior detail is engraved. 1/72nd scale.

2152

BOEING B-29A SUPERFORTRESS ENOLA GAY

It has been said that this plane did more to save millions of lives than any other piece of equipment used in WWII. When Col. Paul Tibbets, Jr. and his crew dropped the first atom bomb, World War II effectively came to an end. The model features a fully detailed bomb bay including the A-Bomb. 1/72nd scale.

2154

BOEING RB-50G RECONNAISSANCE SUPERFORTRESS

So secret were the planes and missions of the RB-50 aircraft, few photos of the long-ranging recon aircraft exist. Between the records of Boeing and personal files of the men who flew these planes, we have been able to reconstruct the plane's configuration and the special equipment it carried. The Caribbean Queen was a particularly attractive aircraft with a colorful history. 1/72nd scale.
