### A passion for precision

In the plastic modeling industry, the competition is talented and driven. Yet no one is more passionate than Academy. We are resolved to deliver the most articulated models modern technology and dedicated artisans can produce. Where possible, we go to great lengths throughout the world to examine the prototype. We take hundreds of photos, make precise measurements, and acquire genuine blueprints. Only when our analysis of the original has been thorough, does the reproduction process begin.

### Technology Fuels Our Passion

Our drive for perfection is supported by advanced technology, talented designers, experienced engineers and skilled craftsmen. Most possess keen modeling skills. For them, creating a model is not merely a job. It's a passion, a quest for perfection. The critical step of developing parts drawings uses the latest CAD (Computer Aided Design) techniques. 3-D modeling software programs help create the final drawings. Academy's CAD/CAE/CAM process is carefully integrated with our entire product development cycle, and coupled with our new CNC molding machines, we can create any shape and wall thickness with error-free tolerances.

### The sum of our parts

This combination of skilled specialist and sophisticated equipment allows us to economically impart realism previously unattainable in plastic model kits. From precise scale to exacting detail, we capture the essence of the original. To mimic life to the fullest, Academy generally provides more parts in every kit, leading to more satisfaction for the earnest modeler. Some tanks feature treads that are built one link at a time as well as amazing interior detailing. Uniforms are creased with care. Movable gun turrets add realism. Helicopters are packed with armament. Aircraft carriers have flight decks filled with scale aircraft. Our mastery of the little things is legendary.

### What does our extreme devotion to perfection mean to you?

Academy raises authenticity to a plateau others can only hope to attain. This in turn allows you to elevate your hobby to the next level. Building an Academy model invites you to stretch your skills and master the art. Only with a perfect kit, can you be rewarded with a perfectly built model. Step up to Academy and feel our passion for precision.

# 1/25 through 1/72 Scale Armor

## Make a little military history of your own

Why do you build military kits? If you're like other serious modelers, you're fascinated with recreating history and proud to show off impeccably detailed displays. Academy's lineup lets you do both.....

beautifully. Our 1/35-scale tanks, armored personnel carriers and other battlefield vehicles are carefully designed down to the smallest feature. Depending on the model, you'll find tanks with exquisite interior crew compartments, realistic bogies, engine and transmission details, crew quarters, and field gear.

Some provide individual treads you assemble one piece at a time, armor plates, ammo, movable turrets and other examples of realism rarely found elsewhere.

The series includes infantry figures in life-like battle poses with facial expressions that speak for themselves. These are the touches that infuse dioramas with life.

# SHIPS & WARSHIPS

## Set sail for an authentic modeling adventure

Spanning thousands of years of naval history, Academy's collection of ships takes you from whalers to warships, from 1/350-scale sail-powered clippers to 1/800-scale nuclear aircraft carriers. All have one feature in common... superb detailing that brings naval history to life. Like radar masts with a wide array of antennas that are true to the original in scale and configuration. On the flight deck a full complement of aircraft, including fixed and rotary wing models, and even the service vehicles are accurately reproduced.

Whether it is the intimidating silhouette of the Bismark, the aircraft-filled flight deck of the Carl Vinson, or the sleek sails of the Cutty Sark, your choice is broad. You'll also find the most authentic reproduction of the Titanic ever made, complete with details like interior flooring, and seven interior staircases. See the entire selection at your hobby dealer.
