The Seven Wonders of Dragon Armor

1 Tracks

Each Dragon Armor item looks like a real tank, and it contains its own individual preformed tracks. Even modelers with ZERO skills can own a high-quality and fully assembled tank!

2 Zimmerit

Dragon's Zimmerit isn't only molded on in the model kit series, but it's also found in the Dragon Armor series. On some specific models, Dragon's Zimmerit is molded on already. These models guarantee an authentic look to the tank straight from the box.

3 Display box included

Dragon Armor tanks are instant displays. There's no need to worry about the safety of the tank as each comes with its own protective DISPLAY CASE!

4 Markings

Dragon Armor tanks are carefully researched for maximum authenticity in detailing - color, camouflage, unit markings, and all the other little things that mark authentic scale models and Dragon Armor tanks.

5 Accuracy

Research is indisputably an essential factor when producing a kit. Each Dragon Armor tank produce in high-level of accuracy, giving the proper and authentic appearance like the real armor.

6 Details

With the aid of advanced molds and techniques, Dragon's engineers were able to include all the appropriate details at the design stage. Each Dragon Armor tank is produced without any exaggeration.

7 True to scale

Wheels, tracks, engines, hull accoutrements... Dragon Armor items are 100% true to scale - they don't look like 'model tanks' - instead they look like TANKS!
