SCALE PLASTIC KITS - EDITIONS

ProfiPACK

In this category these kits are identified with this symbol:

The ProfiPACK is our best, high standard plastic kit edition. Each ProfiPACK kit contains a complete plastic model kit with additional items for various sub-projects, photoetched sets, stencils masks and a large sheet sheet covering four to six magazine spreadable sheets. The ProfiPACK kits are produced in 1/48, 1/72, 1/144 and 1/240 scales.

This line is easily recognizable with its orange coloured box, and with more recent releases, the addition of the ProfiPACK logo. The older ProfiPACK kits had a black box and did not carry the ProfiPACK name. ProfiPACK kits are designed for all moderately experienced modelers.

In this category these kits are identified with this symbol:

WEEKEND EDITION

The Weekend Edition offers a simple and less expensive alternative to the standard ProfiPACK kit. They provide a high quality, limited kit of an historically competitive price. The Weekend edition kits contain a plastic injection molded parts, and build-line specific content.

They contain no additional accessories, and have two working options. These kits are designed for those modelers that don't really require all of the "bells and whistles" of the ProfiPACK kits, and are ideal for beginners and those who want a quick build.

These kits still can be upgraded with separately available accessory sets B, and C, desired.

EDUARD LIMITED EDITION

The Limited Edition kits offer plastic from Eduard, as well as all of those of other manufacturers. The plastic kits are brought up to the ProfiPACK standard of quality. The kits include a large sheet sheet, and parts for the construction of the model. Many of the Limited Editions are offered in a "Build-Complete" version. In this version, they are produced with the various material and colours in mind. Most of these have historically sold-out in a matter of weeks.

SUPER44

In this category these kits are identified with this symbol:

"Super44" is a brand new edition of Eduard 1/144th scale kits. They contain a sheet sheet with at least four working options, with no additional accessories such as photoetched parts. These kits are designed for lovers of 1/144th scale and are ideal for beginners and quick turn-around modelers.

These kits still can be upgraded with separately available accessory sets B, and C, desired.

ROYAL CLASS

The name here is pretty self explanatory. The distinctive black box highlights the top quality nature of the kits, and means you complete kit through the use of the other items included. In some subject matter, the sheets offer 10 + working options with details, a very definitive complement of 1/200 scale, and an extra large instruction booklet. Special bonuses are included in the form of 1/30 replicas of models and images, large scale reference prints, supplementary publications, vinyl prints, or pieces of the subject aircraft relevant to the subject. These kits, although not cheap, are unique in the hobby and target very discriminating modelers, collectors and collector enthusiasts.
