Tous les matériaux, le contreplaqué, le laiton, le métal mou, le caoutchouc, les plastiques, l'aluminium, etc. sont convenablement utilisés dans chaque pièce. Bien que cela est une maquette qui consomme assez de temps pour la monter, elle vous sera une fois finie, un trésor merveilleux.

1/48 SCALE AIRCRAFT SERIES

Hasegawa's 1/48 scale Aircraft Series is a newer line compared with the established 1/72 scale and 1/32 scale lines. Started with the very rare business jet kits, the series is being expanded more into the military category picking up the most popular and characteristic aircraft. The highest molding technology obtained through the long experiences in 1/72 and 1/32 scale aircraft models is fully reflected in this series. Hasegawa's 1/48 scale aircraft kits will never require any filling or adjusting works from you and you can spend more time on painting or other extra works.

Hasegawa Flugzeugserie im Maßstab 1:48 ist eine neuere Linie im Vergleich mit den bestehenden Linien im Maßstab 1:72 und im Maßstab 1:32. Angefangen mit den sehr seltenen Geschäftsdusmaschinenbausätzen, erweitert sich diese Serie zur Kategorie Militär hin und nimmt dabei den geliebtesten und charakteristischsten Flugzeug auf. Die höchste Gußtechnologie, die durch die langen Erfahrungen mit Flugzeugmodellen im Maßstab 1:72 und im Maßstab 1:32 erworben ist, spiegelt sich gut in dieser Serie. Hasegawas Flugzeugbausätze im Maßstab 1:48 nehmen Ihnen keine Arbeit mit dem Füllen und dem Einstellen in Anspruch, so daß Sie mehr Zeit mit dem Anstreichen oder anderen Sonderarbeiten verbringen können.

La série avion à l'échelle 1:48 Hasegawa est une nouvelle création en base des séries 1:72 et 1:32 qui ont déjà eu un grand succès. La série a commencé par les maquettes d'avions à réaction d'affaires et maintenant la série comprend les maquettes d'avions militaires les plus populaires et les plus caractéristiques. La technologie approfondie acquise par une longue expérience en fabrication des maquettes d'avions aux échelles 1:72 et 1:32 est pleinement réverbérée dans cette série. Les maquettes d'avions Hasegawa à l'échelle 1:48 ne vous demandent aucun travail de remplissage d'huile ou de réglage, donc vous pouvez consacrer tout votre temps aux autres travaux comme par exemple ceux de peinture.

1/200 SCALE LL200 SERIES

The LL200 Series, 1/200 scale world's air liner series, offers you the widest range in variety of colorful airline markings. Compared to the usual 1/144 scale for the airliner models, the smaller 1/200 scale is more suitable to scale down those huge passenger aircraft of today to handy tiny models which built up your entire collection of world's airliners. With the minimum number of precisely molded parts and the sharply printed decals, the beautiful airliner can be completed with the minimum effort. The kit includes a simply designed display stand which enables a display in flying condition.

Die LL-200-Serie, Weltverkehrsflugzeug-Serie im Maßstab 1:200, bietet Ihnen den umfangreichsten Bereich in einer Reihe von farbigen Luftverkehrsgesellschaftsmarken an.

Im Vergleich zum normalen Maßstab 1:144 für die Verkehrsflugzeugmodellen ist der kleinere Maßstab 1:200 dazu geeigneter, um jene riesigen Passagierflugzeuge von heute in handliche winzige Modelle maßstäblich zu verkleinern, die Ihre Gesamtsammlung von Weltverkehrsflugzeugen vervollständigen.

Mit Hilfe einer Minimalanzahl von genau gerissenen Bauteilen und scharf gedruckten Abziehbildern kann ein schöner Verkehrsflugzeug mit minimaler Mühe fertig gemacht werden. Der Bausatz schließt einen einfach gestalteten Ausstellungsstand ein, der eine Ausstellung in fliegender Stellung ermöglicht.

La série LL200, c'est une série d'avions de ligne du monde à l'échelle 1:200 qui vous offre la gamme la plus grande de variétés d'avions de ligne pittoresques.

Comparée avec l'échelle 1:44 conventionnelle pour les maquettes d'avions de ligne, cette échelle plus petite 1:200 est plus convenable pour observer minutieusement l'avion de passagers à dimensions énormes d'aujourd'hui en réduisant ses dimensions jusqu'aux dimensions maniables.

Et cela aussi pour augmenter votre collection des maquettes d'avions de ligne du monde.

Avec le nombre minimum des pièces composantes exactes du modèle et les détails nettement imprimés, le bel avion de ligne peut être monté avec le moindre effort. Le jeu comprend un piédestal de conception simple qui permet de montrer l'avion en état de vol.

EGG SHAPED AIRCRAFT SERIES

Hasegawa's Egg Shaped Aircraft Series is a very unique series where many famous World War II fighters, modern jets, helicopters or the Space Shuttle are caricaturized into an egg shape. The kit parts are kept minimum and very simplified so that even a small child can easily build up this cute airplane model. There are many keen adult scale aircraft modellers who enjoy modifications or building comic dioramas with these kits by their own imagination.

Hasegawas Eiförmige Flugzeugserie ist eine sehr seltsame Serie, in der viele berühmte Jäger des Zweiten Weltkriegs, moderne Düsenmaschinen, Hubschrauber und der Spaceshuttle in einer Eiform karikiert werden. Die Bausatzteile sind auf ein Minimum reduziert und weitgehend vereinfacht, damit sogar ein Kind dieses niedliche Flugzeugmodell ohne Schwierigkeit zusammenbauen kann. Es gibt viele begeisterte erwachsene Modellflugzeugbastler, die mit ihrer eigenen Phantasie diese Bausätze gern modifiziert und daraus komische Dioramen gern zusammenbastelt.

EGG OF THE WORLD SERIES

The Egg planes are now refreshed. The early Egg Planes were simply the planes themselves, but since the Space Shuttle, a display stand was set to make a small world. This small world is now enlarged to create a comical space. This new series is named "Egg of The World Series". As is shown by the pictures, each egg plane now has its own scenery. Yes, it is the world where the comical figures create a story together with an egg plane and the scenery.

Die Eiförmigen Flugzeuge haben nun eine Erfrischung. Die früheren Eiförmigen Flugzeuge waren einfach für sich, aber seit dem Spaceshuttle ist ein Ausstellungsstand zusammengestellt, um eine kleine Welt hervorzubringen. Diese kleine Welt wird nun vergrößert, um einen komischen Raum zu schaffen. Diese neue Serie heißt "Erwelt-Serie". Wie im Bild gezeigt, hat jeder eiförmige Flugzeug nun eine eigene Umwelt. Das ist ja eine Welt, wo die komischen Gestalten zusammen mit einer eiförmigen Flugzeug und dessen Umwelt eine Geschichte erzählen.

Les Avions Œufs sont maintenant perfectionnés. Les premiers Avions Œufs ont été simplement les avions mêmes, mais depuis l'entrée en scène des Navettes, un piédestal de démonstration a prit la forme d'un petit globe terrestre. Ce petit globe terrestre est maintenant agrandi pour se faire un espace comique. La nouvelle série s'appelle "la série Œuf du monde". Comme le montre la photo, chaque avion œuf comporte maintenant son propre paysage. Cela veut dire que ces figures comiques créent une histoire avec l'avion œuf et le paysage.
