The Art of Modeling

THE ART OF MODELING

From plastic models and radio-controlled cars to educational construction kits, Tamiya produces over 600 types of fun-filled items. Tamiya's commitment to be "First in Quality Around the World" ensures that only top-notch parts are used for each and every item, and is the reason why Tamiya has become a household name among hobby enthusiasts around the world.

Tamiya's scale models possess such intricate detail that they are often described by modeling connoisseurs as "museum items". These models are nearly perfect replicas of full-size objects, shrunk down to a smaller scale. Through the process of assembling, painting and finishing these accurate models by hand, one is provided with a unique "three-dimensional" insight into the shape and vast detail of the full-sized object at a mere glance. So in addition to the fun of building an accurate replica, Tamiya's kits also provide the joy of learning about the real thing.

Tamiya also offers exciting "mini-motorsports" in the form of Mini 4WD and Dangun Racers. The impressive performance of these minute assembly vehicles can be upgraded with a variety of grade-up parts, allowing racing fun for kids of all ages.

Tamiya's Educational Construction Series focuses on the assembly of fascinating devices that move under their own power. Through the assembly of gears and pulleys, one can learn about the relationship between power and speed. By putting together cams, cranks, and link mechanisms, one can understand the principles of centrifugal force. Furthermore, Tamiya's incorporation of "clean energy" in its items, such as the use of solar cells to generate power, is yet another benefit of this series. Finally, with a full range of supplementary hobby items such as paints and finishing tools, Tamiya offers comprehensive support to the world's hobbyists. So whether it's careful attention to quality, or the commitment to ease-of-assembly and customer support, Tamiya is always striving to create truly fulfilling ways to spend one's time.

Tamiya also places great importance on customer feedback in the development of new items. The internet homepage, www.tamiya.com, puts Tamiya and Tamiya's agents in direct contact with hobby fans around the world. This informative site is frequently updated and features descriptions of new releases with full color pictures, video clips, and assembly tips. Also featured is information about upcoming hobby shows, contests, R/C races, and just about everything a computer-equipped hobby fan could want in a homepage. Check out www.tamiya.com today!

L'ART DU MODELISME

Des maquettes plastiques aux voitures radiocommandées en passant par les boîtes de construction éducatives, Tamiya produit plus de 600 kits du plus grand intérêt. La volonté de perfection de Tamiya exprimée par le slogan "First in Quality Around the World" implique que tous les produits sont constitués de pièces et éléments de premier ordre. C'est la raison pour laquelle Tamiya est devenu et reste de loin la marque de référence pour tous les modélistes de la planète.

Les maquettes plastique Tamiya sont tellement fidèles et détaillées qu'elles sont souvent décrites par les connaisseurs comme de véritables "pièces de musée". Ces modèles sont des répliques conformes des engins réels rétrécis à une échelle inférieure. Après assemblage, décoration et finition, on obtient une reproduction parfaite en trois dimensions des formes et moindres détails de l'engin échelle 1. En plus du plaisir de réaliser une réplique exceptionnelle, les kits Tamiya et leur notice très documentée permettent d'apprendre beaucoup sur les sujets traités.

Tamiya vous propose également de pratiquer le "Mini-Sport Automobile" sous la forme des Mini4WD et Dangun Racers. Les performances impressionnantes de ces minuscules bolides peuvent être encore accrues au moyen de nombreuses pièces optionnelles : la fièvre de la compétition pour les garçons de tous les âges !

La série des constructions éducatives comprend de fascinants modèles animés à construire. L'utilisation d'engrenages et de poulies permet de comprendre les relations entre puissance et vitesse. En assemblant comes, leviers et divers types de liaisons mécaniques, on peut découvrir les principes de la force centrifuge. De plus, Tamiya fait appel de plus en plus à l'énergie "propre" en utilisant des cellules solaires pour alimenter les moteurs de certains modèles. Enfin, avec une gamme complète d'outils et de produits de finitions comme les peintures, Tamiya offre aux modélistes tout ce qu'il faut pour obtenir de véritables chef-d'œuvres. Fruit de la recherche de la qualité absolue, facile à assembler et répondant aux attentes des consommateurs, tout produit Tamiya est un excellent moyen d'occuper sainement et agréablement son temps libre !

DIE KUNST DES MODELLBAUS

Von Plastikmodellen und funkferngesteuerten Autos bis hin zu lehrreichen Baukästen stellt Tamiya mehr als 600 verschiedene Artikel her, die viel Freude bereiten. Tamiya's Anspruch auf "Weltweit beste Qualität" garantiert die Verwendung von ausschließlich erstklassigen Teilen für wirklich jeden Artikel, deshalb ist auch der Name Tamiya unter Modellbauern auf der ganzen Welt zu einem Elitebegriff geworden.

Die maßstabgetreuen Modelle von Tamiya verfügen über so raffinierte Details, dass sie oft von Modellbaufachleuten als "Museumsqualität" bezeichnet werden. Diese Modelle sind praktisch perfekte Wiedergaben des originalgroßen Objekts, geschrumpft auf einen kleineren Maßstab. Während des eigenhändigen Zusammenbaus, beim Lackieren und Fertigstellen dieser akkuraten Modelle erfährt man unmittelbar den einzigartigen "dreidimensionalen" Einblick in das Aussehen und die umfangreichen Details der originalgroßen Objekte. So ergibt sich zusätzlich zum Genuß des Baus einer akkuraten Wiedergabe auch die Freude darüber, vieles bezüglich des echten Gegenstücks zu lernen.

Darüber hinaus bietet Tamiya den spannenden "Mini-Motorsport" in Form der Mini4WD- und DangunRacer. Die eindrucksvolle Leistung dieser minutenschnell zusammengebauten Fahrzeuge kann noch mit einer breiten Palette von Umrüstungsteilen aufgemotzt werden und bietet Kindern jeglichen Alters viel Rennspaß.

Tamiya's Serie Lehrreicher Baukästen zielt auf den Zusammenbau faszinierender Geräte, die sich aus eigener Kraft bewegen. Beim Zusammensetzen von Getrieben und Riemenscheiben lernt man viel über den Zusammenhang zwischen Leistung und Geschwindigkeit. Indem man Nocken, Kurbelwellen und verbindende Mechanismen zusammenbaut, wächst das Verständnis von dem Prinzip der Zentrifugalkraft. Darüber hinaus ist die Verwendung "sauberer Energie", wie etwa stromerzeugender Solarzellen, seitens Tamiya ein weiterer Pluspunkt dieser Serie. Schließlich bietet Tamiya mit einem breit angelegten Bereich von ergänzenden Hobbyartikeln, wie Farben und Werkzeugen, eine umfassende Unterstützung für alle Hobbyfreunde der Welt. Sei es der sorgfältige Umgang mit Qualität oder die Verpflichtung zu leichtem Zusammenbau und Kundenunterstützung, Tamiya ist stets bemüht, sich Wege einfallen zu lassen, die zu einer befriedigenden Freizeitgestaltung beitragen.

EL ARTE DEL MODELISMO

Desde maquetas de plástico y vehículos de radio control hasta kits de montaje educativos, Tamiya produce más de 600 artículos llenos de diversión y entretenimiento. El compromiso adquirido por Tamiya, que figura en su slogan "First in Quality Around the World" (líder mundial en calidad), garantiza que solo se utilicen materiales de primera calidad en la construcción de cualquiera de sus artículos, y constituye además la razón por la que Tamiya se ha convertido en la referencia entre los aficionados al hobby en todo el mundo.

Los modelos de Tamiya reproducen los originales con tanta fidelidad y grado de detalle, que son consideradas piezas de museo, por los modelistas expertos. Estos modelos son réplicas prácticamente perfectas de los objetos que reproducen a un tamaño reducido. A través del proceso manual de montaje, pintura y acabado, el modelista llega a tener una percepción tridimensional precisa y detallada del objeto real. Por ello, además de la diversión que resulta de la propia construcción de la maqueta, los kits de Tamiya proporcionan también la satisfacción de conocer muchos aspectos del objeto real.

Tamiya te ofrece también pequeños vehículos motorizados de 2 tipos (Mini 4WD o Dangun Racers). Estos modelos de increíbles prestaciones se ensamblan en minutos y pueden mejorar sus prestaciones con el uso de piezas especiales, permitiendo disputar divertidas competiciones a niños de cualquier edad.

La línea de construcciones educativas de Tamiya se centra en el ensamblado de artilugios fascinantes que utilizan su propia energía para realizar alguna función. Mediante el ensamblado de piñones y poleas, se asimilan fácilmente nociones importantes como la relación entre la potencia y la velocidad. Acoplando levas, manivelas y elementos de transmisión, se comprenden rápidamente los fundamentos de la fuerza centrífuga. Además, la incorporación de la energía ecológica, con el uso de pequeños paneles solares para generar la potencia necesaria, constituye un aliciente añadido. Finalmente, con una amplia línea de accesorios como pinturas y herramientas de acabado, Tamiya proporciona todo lo que los modelistas necesitan. Manteniendo firmemente su compromiso de calidad y facilidad en el montaje, Tamiya se esfuerza continuamente para proporcionarnos una forma divertida de disfrutar de nuestro tiempo libre.

R/C TANK BATTLE SYSTEM SERIES

Dramatic tank vs. tank combat is possible with this series of compact 1/35 scale R/C tank models. Light and sound effects coincide with the precisely controlled tank movements. Together with engine sounds, the muzzle flash, hull recoil, and cannon roar which accompany the main gun firing help provide an exciting experience. Furthermore, Tamiya's unique LED battle system and a digital proportional 2.4GHz transmitter enable multiple tanks to join the fray with ease.

SERIE DER GEFECHTS-SYSTEME Maßstab 1:35

Spannende Kämpfe Panzer gegen Panzer sind in der Baureihe von RC-Panzermodellen im kompakten Maßstab 1:35 möglich. Licht- und Geräusch-Effekte passen genau zu den präzise gesteuerten Panzerbewegungen. Zusammen mit Motorengeräusch, aufblitzendem Mündungsfeuer, Rumpf-Rückstoß und Kanonendonner, welcher das Feuern des Hauptgeschützes begleitet, sorgen sie für ein aufregendes Erlebnis. Darüber hinaus ermöglicht Tamiyas einzigartiges Gefechts-System und ein digital-proportionaler 2.4GHz Sender spielend leicht die Teilnahme beliebig vieler Panzer an der Auseinandersetzung.

SERIE SIMULATION DE COMBAT 1/35

Des effets lumineux et sonores sont associés aux mouvements et actions du tank que l'on pilote précisément au moyen d'un émetteur digital proportionnel 2.4GHz. Bruits du moteur, tir du canon avec grondement, éclair lumineux et recul de la caisse procurent des sensations incroyables. Le système de simulation de combat unique en son genre avec LEDs signale les coups au but et l'endommagement du véhicule.

1/700 Scale WATER LINE SERIES

WWII and modern warships from the navies of various nations have participated in many historic actions on the oceans of the world. With over 100 models, the 1/700 Water Line Series, a collaborative effort between three Japanese model manufacturers, is the largest of its kind in the world and enables you to assemble your own collection of these famous ships. As the name implies, these models replicate the portion of the ship above the waterline, and may be displayed on a flat surface as though they were at sea. The 1/700 scale also offers a sensible size for collecting without compromising detail.

WATERLINE SERIE

Kriegsschiffe aus dem 2. Weltkrieg und moderne aus der Marine der verschiedensten Nationen waren an vielen historischen Aktionen auf den Ozeanen dieser Welt beteiligt. Mit mehr als 100 Modellen ist die 1:700 Wasserlinien-Serie, eine Zusammenarbeit von drei japanischen Modell-Herstellern, die größte ihrer Art und ermöglicht Ihnen eine eigene Sammlung dieser berühmten Schiffe zusammenzustellen. Wie der Name sagt, geben diese Modelle den Bereich des Schiffs oberhalb der Wasserlinie wieder und können auf ebener Unterlage ausgestellt werden, als wären sie auf See. Der Maßstab 1:700 bietet auch eine vernünftige Größe für eine Sammlung, ohne im Detail Abstriche zu machen.

SERIE "WATERLINE"

Des navires de combat de la 2^{ème} G.M. et contemporains de diverses nations ont participé à de nombreuses opérations sur tous les océans du monde. Avec plus de 100 modèles, la série Water Line 1/700, fruit de la collaboration entre trois fabricants de maquettes japonais est la plus importante en son genre et elle vous permettra de constituer votre collection de ces navires célèbres. Comme le nom l'implique, ces modèles ne sont reproduits que jusqu'à ligne de flottaison et peuvent être exposés sur une surface plate, comme s'ils étaient en mer. L'échelle du 1/700 offre un encombrement limité sans sacrifier les détails.

SERIE LINEA DE FLOTACION

Barcos de la Segunda Guerra Mundial y modernos de varias naciones han participado en numerosas batallas históricas en todos los océanos. Con más de 100 modelos, la serie Water Line a escala 1/700, un esfuerzo colaborador entre tres fabricantes de modelos japoneses, es la más grande de este tipo en el mundo y le permite montar su propia colección de estos famosos barcos. Como su propio nombre indica, estos modelos reproducen la parte del barco por encima de la línea de flotación, y pueden ser expuestos en una superficie plana como si estuviesen en el mar. Asimismo la escala 1/700 ofrece un tamaño cómodo para coleccionar sin renunciar al más mínimo detalle.

TAMIYA COLOR

TAMIYA COLOR SPRAY PAINTS (TS)

These cans of spray paint are extremely useful for painting large surfaces. The paint is a synthetic lacquer that cures in a short period of time. Each can contains 100ml of paint, which is enough to fully cover 2 or 3, 1/24 scale sized car bodies. Tamiya spray paints are not affected by acrylic or enamel paints. Therefore, following the painting of the entire assembly, details can be added or picked out using enamel and/or acrylic paints. By combining the use of these three types of paints, the finishing of plastic models will become simpler and more effective.
